HOW TO SWITCH THE MODES ON GROM-USB2
(for CD changer emulation only, don't use it for XM/SAT emulation*)

Please read this part entirely before attempting to change the modes. You will need to perform all the steps below <u>quickly with 1-2 seconds interval.</u>

Depending on your GROM firmware version, GROM-USB2 can work in two or three modes: **USB, AUX or iPod.**

STEP 1: When you need to switch between the MODES, first you will need to enter into the "MODE CHANGING" state on your car stereo. There are two possible scenarios:

1. The stereo is already in the CD changer mode (GROM USB is activated). **Press FM/AM -> ** wait 1-2 second **-> press CD (DISC)**.
2. The stereo is in any other mode (FM, SAT, etc…): **press CD (DISC) ->** wait 1-2 second **-> press FM/AM ->** wait 1 second **-> press CD (DISC)**.

STEP 2: You will hear the voice announcing the currently playing mode (USB, AUX or iPod). To switch to the next mode, press **Next Track** button <u>quickly</u> (⊳ , ∧ or respective button on your car stereo) while the voice prompt is announcing. The next mode will be announced right after. If you need to select another mode, simply press **Next Track** button again and so on until you select the desired mode.

Note: If you do not hear the voice announcement, it means that you did not press quickly enough and the adapter is not in the "MODE CHANGING" state anymore. Please perform STEP 1 again.

Once you hear the desired mode announcement, simply wait for 1-2 seconds and the adapter will start operating in that mode.

* GROM uses CD changer emulation for most of the supported car makes except Nissan/Infiniti with CAT/SAT printed on the stereo, Ford/Lincoln/Mercury (US), and Honda/Aura 03 and up with the special XM firmware.
